

SCD 7-Day Meal Prep System

Specific Carbohydrate Diet - Batch Cooking, Sauce Rotation, Freezer Scaling & Kid-Friendly Adaptations

Overview

This system is designed for:

- Specific Carbohydrate Diet (SCD) compliant
- Minimal waste through ingredient overlap
- Batch cooking 2-3 times per week maximum
- Family-friendly (adults and kids together, no separate cooking)
- Freezer scalability up to 30 days

Core proteins: Chicken, Beef, Pork

Core meth

Reference for legal/illegal foods: scdrecipe.com/legal-illegal-list. All ingredients below were chosen to fall on the SCD legal list (no grains, no sugar, no starches, no processed foods, no non-compliant sauces).

Master Shopping List (Low Waste)

Proteins

- Chicken thighs or breasts (6-8 lb)
- Beef chuck roast (3-4 lb)
- Pork loin (2-3 lb)

Vegetables

- Zucchini (6-8)
- Carrots (2-3 lb)
- Broccoli (2-3 heads)
- Spinach (2 large boxes)
- Yellow onions (6-8)
- Garlic (1 bulb)
- Celery (optional, for broth)
- Cauliflower (1-2 heads, for "rice")

Fats and Basics

- Olive oil
- Lemons (4-6)
- Sea salt
- Black pepper (optional, depending on strictness)
- Apple cider vinegar (SCD-legal if tolerated)

Optional SCD Fruit

- Apples
 - Blueberries
 - Bananas (ripe, limited)
-

Core Cook Session (2-3 Hours)

1. Chicken (base protein)

- Olive oil + salt + garlic
- Bake at 400 deg F for 35-45 min
- Shred half, slice/leave half whole

2. Beef (slow cook, set-and-forget)

- Chuck roast + onion + garlic + salt
- Slow cooker or Dutch oven, 6-8 hours
- Shred completely when done

3. Pork Loin (roast)

- Olive oil + rosemary + salt
- Bake at 375 deg F for 45-60 min
- Slice thin for reuse meals

4. Vegetables (roasted tray)

- Zucchini + carrots + broccoli
- Olive oil + salt
- Bake at 400 deg F for about 25 min

5. Bone Broth (zero-waste win)

- Chicken bones + beef scraps + onion + celery
- Simmer 12-24 hours

6. Cauliflower Rice (rice substitute)

- Pulse cauliflower in a food processor
- Saute in olive oil + salt

7-Day Rotation Meal Plan

Day 1

- Breakfast: Chicken + sauteed spinach
- Lunch: Beef + roasted carrots + broth
- Dinner: Pork slices + zucchini + cauliflower rice

Day 2

- Breakfast: Bone broth + shredded chicken
- Lunch: Beef bowl + broccoli + olive oil drizzle
- Dinner: Chicken + roasted veg mix

Day 3

- Breakfast: Pork + spinach
- Lunch: Beef + cauliflower rice bowl
- Dinner: Chicken soup (broth + chicken + carrots)

Day 4

- Breakfast: Bone broth + pork slices
- Lunch: Chicken + zucchini + onions
- Dinner: Beef + broccoli + olive oil

Day 5

- Breakfast: Chicken + spinach saute
- Lunch: Pork + roasted vegetables
- Dinner: Beef stew (broth-based)

Day 6

- Breakfast: Bone broth + chicken
- Lunch: Chicken + cauliflower rice
- Dinner: Pork + zucchini + carrots

Day 7

- Breakfast: Pork + spinach
- Lunch: Beef + roasted veg
- Dinner: Clean-out-the-fridge stew (all proteins + broth + veg)

Daily Structure (Adult Baseline)

Flexible target pattern (no rigid calorie counting unless you want it):

- Protein: 2 palm-sized servings per day
- Vegetables: 2-4 cups per day
- Fat: olive oil / broth added per meal
- Fruit (optional SCD): 1-2 servings per day max

Typical day:

- Breakfast: chicken or pork + sauteed spinach, OR bone broth + shredded meat
- Lunch: beef + roasted vegetables + olive oil/lemon sauce
- Dinner: rotating protein + veg + broth-based sauce
- Optional (kids): SCD fruit (apple slices, blueberries, banana if tolerated)

SCD-Compliant Sauce System (Key to Success)

This is the most important section. Rotating sauces is what keeps the same ingredients from becoming boring. All are SCD legal: no starch, no sugar, no dairy (unless you make 24-hour SCD yogurt separately).

1. Garlic Lemon Olive Oil Drizzle (base sauce)

- Olive oil + fresh lemon juice + minced or roasted garlic + salt
- Bright, Mediterranean feel. Use on everything. Prevents "bland chicken fatigue."

2. Bone Broth Reduction Glaze (gravy replacement)

- Simmer broth until slightly thickened, add salt + rosemary
- Pour over beef or pork

3. Roasted Carrot Puree Sauce (kid favorite)

- Roasted carrots + olive oil + splash of broth, blended smooth
- Naturally sweet; great for kids, pork, and chicken

4. Zucchini Herb Sauce (green / pesto substitute)

- Cooked zucchini + olive oil + garlic + basil or parsley, blended lightly

- Works like pesto without dairy

5. Onion Jam (SCD version)

- Slow-cooked onions (very slow, no sugar) + olive oil + salt
- Adds sweetness without violating SCD

6. Apple Cinnamon Meat Glaze (kids love this)

- Cooked apple + cinnamon + broth reduction
- Great with pork or chicken

7. Comfort Soup Base (reset meal)

- Bone broth + shredded chicken or beef + carrots + spinach
- Your reset meal when everything feels repetitive

Freezer System (30-Day Scaling)

You already have the core week. To scale, you do not add recipes - you increase batch volume.

Weekly rotation

- Week A: Chicken heavy, beef moderate, pork light
- Week B: Pork heavy, chicken moderate, beef light
- Week C: Beef heavy, chicken moderate, pork light
- Week D: Clean out freezer + mixed meals

Batch storage targets (about 30 days)

- 20-24 chicken portions
- 16-20 beef portions
- 14-18 pork portions
- 20+ vegetable packs
- 15-20 broth packs

Store everything FoodSaver / vacuum-sealed and flat-packed for fast freezing and reheating.

Kid System (Ages 9 and 6, No Separate Cooking)

Most strict diets fail on acceptance, not rules. Solve it with presentation, not different food.

Rule: same food, different format.

- Adults: plated meals
- Kids: dip + bowl + finger-food system

Kid-approved formats

- Dip meals: chicken strips + carrot puree sauce + zucchini sauce
- Soup bowls: broth + shredded meat + soft veg
- Meat + sweet veg combo: pork + roasted carrots (natural sweetness helps acceptance)
- Snack boxes: sliced chicken + SCD fruit + soft carrots

Fruit strategy

Use apples, blueberries, and bananas (if tolerated) as a side reward, a sauce base, or a snack bridge - not as the main meal.

Strict SCD Reminders

Avoid completely:

- Grains, rice, potatoes, and other starches
 - Sugar, maple syrup, honey (unless your strict SCD stage allows honey)
 - Processed meats
 - Soy and dairy (unless homemade 24-hour SCD yogurt)
 - Store-bought sauces and dressings
-

How This System Stays Non-Boring

You do NOT change ingredients. You rotate four things:

1. Sauce rotation - same chicken becomes 5+ different flavors
2. Texture rotation - shredded, sliced, stew, pan-seared reheats
3. Temperature rotation - hot bowl, soup, warm plate
4. Pairings - mix which protein meets which veg and sauce

Same food, different experience. This matters more than adding new recipes.

Final System Summary

- 7-day rotation built on 2-3 batch cooks
- 30-day freezer scaling via volume, not new recipes
- 7-sauce SCD-legal flavor library
- Kid adaptation layer (same food, different format)
- Zero-waste ingredient overlap across all proteins and veg
